## reward structure explained

### halving

Similar to Bitcoin, FYD has a yearly event where the blockrewards are reduced

### masternodes

by locking up 400.000 FYD in your own wallet users can generate more rewards than staking

### staking

by holding FYD in a personal wallet, users can earn a passive income through staking rewards

## project and code **inspiration**

**Bitcoin** is the first **decentralized cryptocurrency** with a **finite supply**. The pioneer of **digital assets**.

**DASH** is the first crypto to introduce **masternodes**, **instant sending**, and **micro transaction fees**.

**PivX** is the first crypto to introduce **proof of stake** where **stakers replace miners** to verify transactions
